

# How to enter Indian Walk Veterinary Center

1.

Call us when you are here and put on your mask. Our team will fully sanitize a room for you to directly enter. Please DO NOT enter the building until directed.

2.

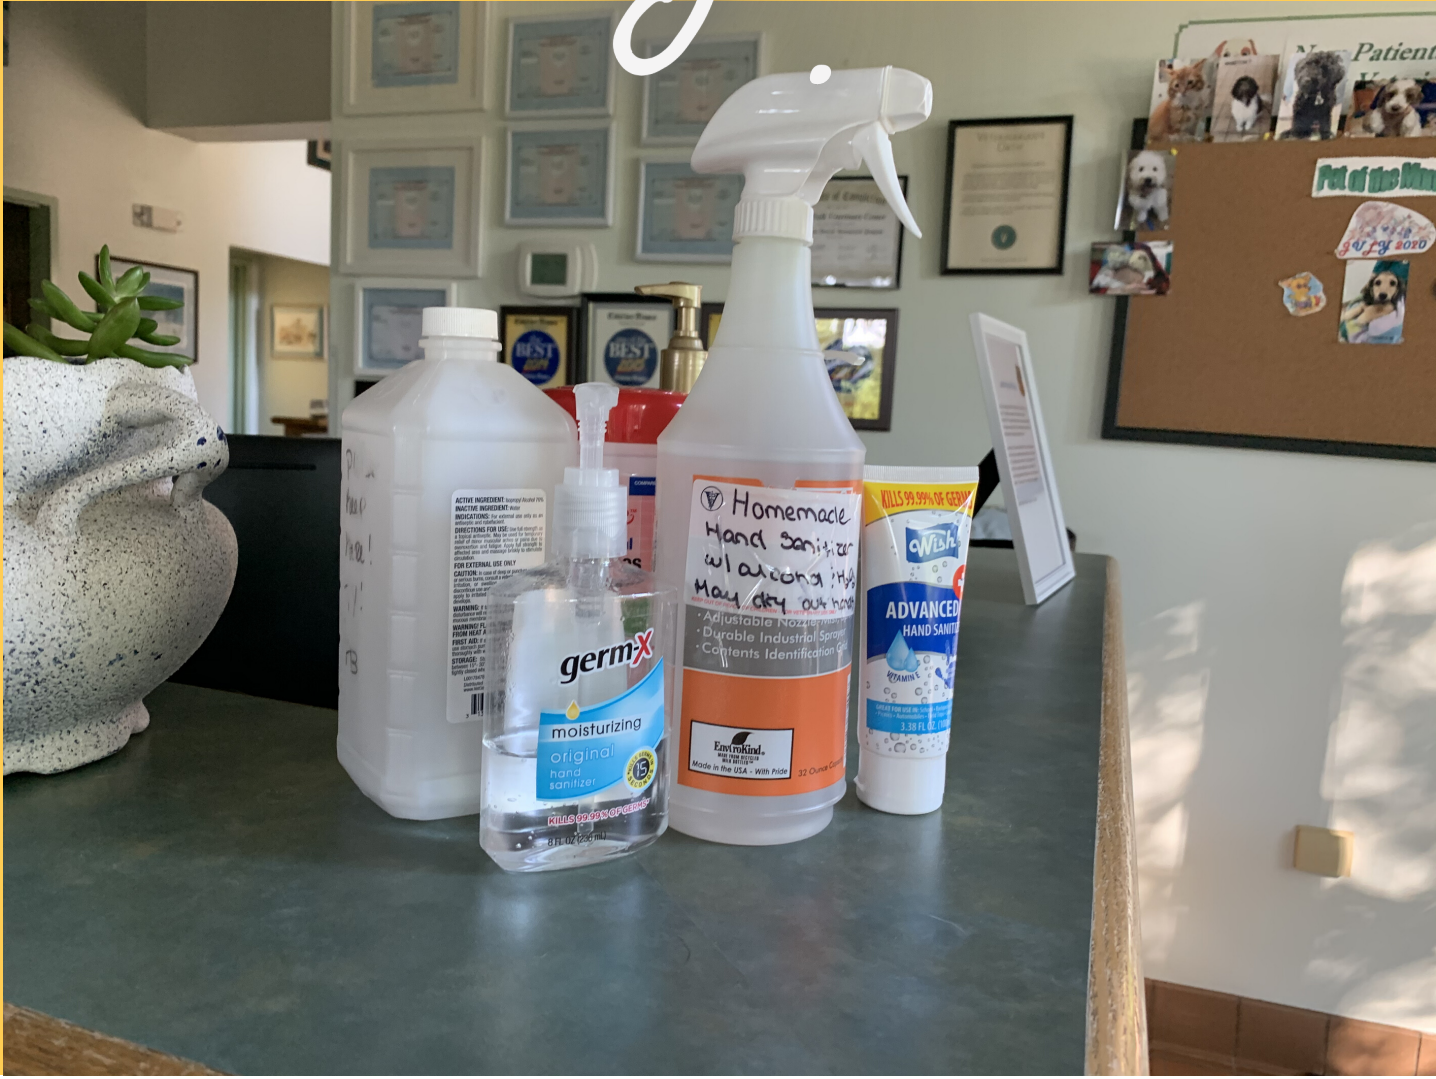

Once a room is ready, we will call you. Please wait at the front door until a nurse escorts you and your pet inside. We ask at this time only ONE client allowed in the building.

**Please note: If you have potentially been exposed in the past 14 days, do not have a mask on hand or are unable to wear one, have been feeling ill, or know someone feeling ill, we kindly ask that you take advantage of our curbside service that we will continue to provide to all clients at this time.**

3.

Feel free to use our hand sanitizing station as you travel to the exam room.

4.

Once in a room, please proceed immediately to the designated "safe space" for you while we collect a history and examine your pet.

5.

During the appointment, please keep you mask on and stay seated in the designated area at all times. This area is to keep you, other clients, and our staff safe and is the only way we can start to provide in-person services at this time.

6.

You will stay in the room for any necessary treatments and for final check out. Head on home and enjoy!

*Thank you for your cooperation and patience.*
