

To help your adult dog enjoy a happy, healthy life, this preventive care diagnostic bundle includes:

Chemistry profile and complete blood count (CBC)

\$125.00

A blood chemistry profile, including SDMA, provides information about your dog's kidneys, liver and pancreas as well as other functions of the body, such as blood sugar and hydration. A CBC can identify infection, inflammation and anemia.

Infectious disease screening

\$63.00

This screening identifies whether your dog has been exposed to heartworm or other important tick-borne diseases.

Fecal test

\$44.10

This test checks for intestinal parasites that may live in your dog's gastrointestinal tract. Since they are usually hidden from view, the only way to detect and identify most intestinal parasites is by doing a fecal test.

Complete urinalysis

\$65.85

This analysis assesses the overall health of your dog's urinary tract including the kidneys and bladder. It identifies infection or inflammation in the urinary tract.

Regular total cost

\$297.95

Discounted preventive care bundle cost

\$152.50

Caring for Pets and the People Who Love Them

To help ensure good health as your dog ages, this preventive care diagnostic bundle includes:
